

IAL In-depth Market Survey
**The Eastern European Market for
Thermal Insulation Products - 2002**
First Edition

Published: November 2002

IAL Consultants has completed a new multi-client survey on the markets for Thermal Insulation Products in Eastern Europe.

This is a companion volume to IAL's recently published survey on the Western European markets for Thermal Insulation Products. This will be IAL's first edition covering this market and builds upon IAL's knowledge of this market. The survey details the market for 2001 and projected sales of thermal insulation products through to 2006.

The research has drawn on the extensive database on thermal insulation markets developed by IAL for previous multi-client surveys carried out since 1988 and on other published studies that have discussed specific raw materials used in thermal insulation products.

The contents of the report are based on a thorough investigation of the market that has included extensive primary research and comprehensive coverage of all relevant secondary sources. A substantial number of interviews were carried out across Eastern Europe with manufacturers, converters, distributors and end-users as well as with representatives of relevant trade associations.

The geographical scope of the study includes all the major Eastern European markets for thermal insulation products. The results have been presented in separate country (or groups of countries) volumes.

Information provided includes:

- Review of the market by type of insulation
- Consumption volume (m³/tonnes) and value by material and by end-use
- Trends and factors affecting the industry
- Profiles of the major companies involved in the market
- Forecasts to the year 2006
