The introduction of new regulations and standards covering the construction industry across Europe has been one of the most important developments in recent years concerning the usage of thermal insulation products. Moreover, varied trends in the usage of the different products, as well as the economic slowdown, have also affected markets throughout the region.

These **Industry Overviews** cover the European market for thermal insulation materials in four separate volumes: **mineral fibre**; **expanded polystyrene**; **extruded polystyrene** and **polyurethane**. The data covers all major Western and Eastern Europe countries as follows:

| | | | |
|------------------|-----------|-----------|--------------------|
| • Austria | • Finland | • Italy | • Slovakia |
| • Benelux | • France | • Norway | • Spain & Portugal |
| • Bulgaria | • Germany | • Poland | • Sweden |
| • Czech Republic | • Hungary | • Romania | • Switzerland |
| • Denmark | • Ireland | • Russia | • UK |

The **Industry Overviews** provide summary market data on current and forecast European markets for thermal insulation materials, broken down by country and type, as well as showing current growth rates and presenting a brief analysis of market trends. They also give a short list of major manufacturers in the sector.

Other planned Industry Overviews from IAL Consultants:

- The European Flavours and Fragrances Market
